

**Sienna Plantation MUD No. 2
Ditch Improvement Projects
March 20, 2006**

1. Phase I – “West End Improvement Package”

We are to receive the comments from Missouri City by the middle of this week and the comments from the County by the end of the week. We anticipate being ready to bid the project by April 10, 2006 and receive bids by May 1, 2006. If there are any additional issues or comments raised by the City or County they could be addressed by addendum during the bid.

We have reviewed the Schindler Court and based on using a direct-load arch pipe for 18” pipe, the outfall for Schindler Court can remain. We have contacted the City to discuss obtaining a variance for the cover over the pipe.

2. Phase II

This area includes the remaining area west of Sienna Parkway and the cul-de-sac improvements east of Sienna Parkway. We will have the plans ready to submit for review to the City and County by May 1, 2006. Allowing for some review time by the City and County, the plans would be ready to bid by the end of May.
